CAREER OBJECTIVE

A dedicated Junior Full Stack Developer with hands-on experience in the MERN stack and Next.js, seeking opportunities to build scalable and user-focused web applications. Currently pursuing a BSc. in Computer Science at AIUB while actively developing real-world projects. Aspiring to grow as a developer in a global tech environment and contribute to impactful products.

SKILLS

Technical Skills: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Node.js, Express.js, MongoDB, Tailwind CSS, DaisyUI, HeroUI, REST API, Git, GitHub, Vercel, Firebase, Postman, Figma

Authentication: BetterAuth, JWT, Google OAuth

Interpersonal Skills: Problem Solving, Self-Learning, Time Management, Team Collaboration

PROJECTS

DocAppoint — Doctor Appointment Manager

Stack: Next.js, Express.js, MongoDB, JWT, BetterAuth, Tailwind CSS

Live: docappoint-client-indol.vercel.app | [Server-Link](#) | [Client-Link](#)

A full stack doctor appointment booking system where patients can browse doctors, book appointments, and manage bookings via a secure authenticated dashboard.

- JWT-based authentication with protected private routes and Google OAuth via BetterAuth
- Doctor browsing with search by name, category filtering, and detailed doctor profiles
- User dashboard to view, update, and delete bookings with instant UI updates and toast notifications
- Responsive design with profile management, custom 404 page, and SEO metadata on all routes

OpenShelf — Online Book Borrowing Platform

Stack: Next.js, BetterAuth, MongoDB, Tailwind CSS, DaisyUI

Live: <https://open-shelf-ten.vercel.app> | **GitHub:** github.com/farhansm01/OpenShelf

A book borrowing platform where users can browse, borrow, and manage books digitally with a clean and intuitive interface.

- Google OAuth authentication with protected routes using BetterAuth
- Dynamic book browsing with category filtering and real-time availability status
- User dashboard for tracking borrowed books and borrowing history
- Responsive UI with custom DaisyUI theme and SwiperJS testimonials carousel

Dragon News — Category-Based News Platform

Stack: Next.js, BetterAuth, Tailwind CSS, React Marquee

Live: <https://dragon-news-omega-lemon.vercel.app> | **GitHub:** github.com/farhansm01/Dragon-News

A news portal with category-based browsing, private routes, and OAuth login built with Next.js App Router.

- Category-based news browsing with dynamic sidebar navigation
- Private route protection — unauthenticated users redirected to login
- Google OAuth login with BetterAuth and session management
- Live news ticker using React Marquee for real-time headline display
